## L.P.G. SENSOR 0 - 90 ohm code AEB1000

### FITTING INSTRUCTIONS

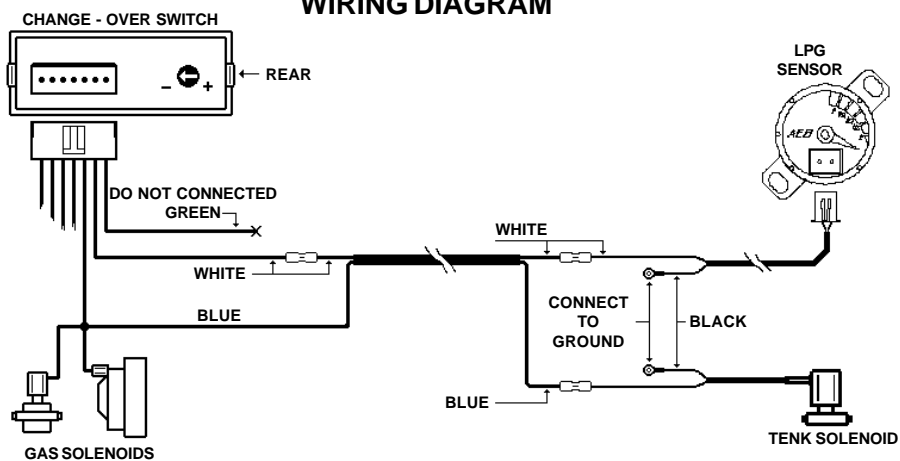

- 1) Install the sensor on the multivalve using the screws and washers placed on it.
- 2) Connect the wiring harness to the sensor and to the extension.

**It is possible to make a little adjustment of the number of kilometres that can be travelled over on reserve mode.**

**N.B.** This sensor can be coupled with all devices provided with a level gauge indicator which can work with variable signals from 0 to 90  $\Omega$
